

EasyMobile

The Easy Mobile app and Push Button turn your Android device into a simple, easy-to-use Mobile Phone.

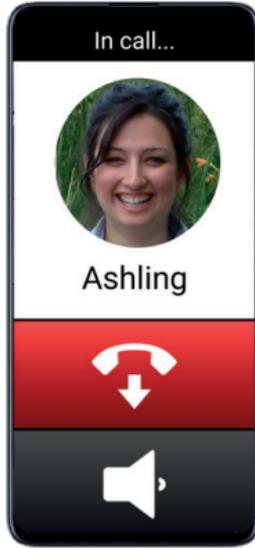

Unique Perspectives Limited

The App

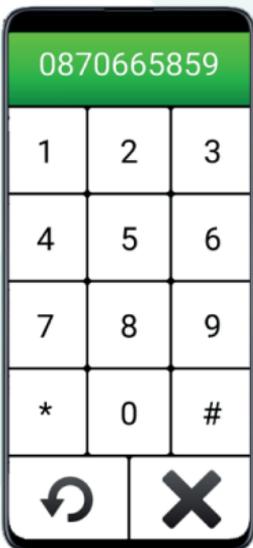

Easy Mobile overcomes the complexity of modern mobile phones by combining the Phone, Contacts and Home Screen functions into a single easy-to-use app. It is ideal for elderly people and those with physical disabilities or cognitive issues who need a simple way to make and receive phone calls.

The Push Buttons

For persons who cannot always hold their phone a Push Button can be programmed to answer a call, dial a close contact, look at pictures and other basic tasks. The buttons are available in a variety of shapes with different target areas and operating forces.

Standard

Measuring 5x4cm and featuring a pocket to insert your own button label the standard version comes with a lanyard, belt clip and long-life battery.

Large Circular

With a large 5cm target area this top of the range accessibility switch can be mounted on a suitable bracket for accurate positioning.

Small Circular

3½cm in diameter and powered by a coin battery this version can be supplied with a wrist strap or a lanyard.

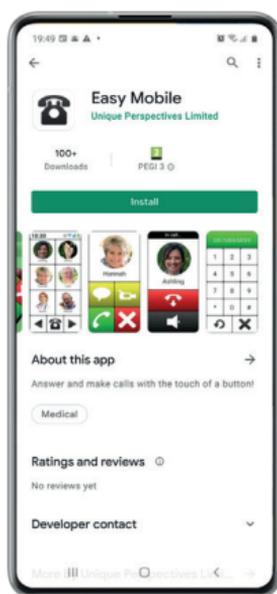

Switch Input

Use your own accessibility switch such as a Buddy Button or Spec switch. For makers the circuit board is available separately.

Download the App

The Easy Mobile app is available on the Google Play Store or directly from our website. If WhatsApp is installed on your device you can also manage internet voice and video calls. The app can be installed on any phone or tablet running Android 9 or higher and replaces the default Phone and Home Screen apps.

Getting support

We have agents in many countries throughout the world who will be happy to introduce you to Easy Mobile. Visit our website at www.housemate.ie for further information.
